written for nonscientists one earth one future can help individuals understand the basic science behind changes in the global environment and the resulting policy implications that the population of the entire planet must face the volume describes the earth as a unified systemâ exploring the interactions between the atmosphere land and water and the snowballing impact that human activity is having on the systemâ and presents perspectives on policies and programs that can both develop and protect our natural resources one earth one future discusses why such seemingly diverse issues as historical climate change species diversity and sea level rise are part of a single pictureâ and how human activity is the critical element in that picture the book concludes with practical examinations of economic security and development questions with a view toward achieving improvements in quality of life without further environmental degradation one earth one future is must reading for anyone interested in the interrelationship of environmental matters and public policy issues

international relations and history were once academic fields sharing a common concern with the affairs of empires states and nations over the course of the twentieth century however they drifted apart international relations largely retained the focus on the affairs and relations of these principal international actors but took a methodological turn leading to higher levels of theoretical abstraction history on the other hand retained the methods that define the discipline but shifted the focus veering away from matters of state to the vast array of actors events activities and issues that colour everyday life in recent years the drift has been arrested by scholars in each discipline who have turned towards the other discipline in their research international relations has undergone a historiographical turn while history has taken an international turn rise of the international brings together scholars of international relations and history to capture the emergence and development of the thought the relations and the systems that have come to be called international in western discourse the evidence offered by contributors to the volume suggests there has been no single stable unchanging concept or object of theoretical reflection or historical investigation that can be called the international but a variety of historically contingent conceptualizations across different contexts

many of the best known and most popular children s stories of the 20th and early 21st century were written by veterans of world war i and world war ii these include works by such writers as a a milne c s lewis roald dahl ian fleming and j r r tolkien among others although they had experienced war most of the veterans did not

overtly write about it the seeming paradox of warriors who went through searing combat and then wrote books for children has not been addressed collectively before now the essays in this book explore what motivated these veterans to write for children what they wrote and how their writing was influenced by the wars they lived through it examines how their combat experience can be traced in their writing however subtly whether it was stories about a bear and his piglet companion a world war i flying ace or a flying car their reactions to war as reflected in their writing yield important lessons about the complicated legacy of the 20th century s two great conflicts and their long lasting impact through children on society at large
